

I love John E's massageit definitely WORKS!

When I met John, my main complaint was my right thumb. I had so much pain in it I couldn't stretch it open all the way, and could not even hold onto the steering wheel in a normal way. Little by little I was losing the use of it. My primary doctor had told me it was something that I just had to learn to live with since aches and pains come along with getting older.

Over several visits, John has restored the use of my thumb and the pain is gone. I am so happy to have the use of the thumb again, and be relieved of that chronic pain.

I definitely recommend that anyone with chronic pain visit John and see what he can do for you!
